## REPUBLICAN-READY 2018

IT'S BEEN QUITE A YEAR WITH REPUBLICANS IN CHARGE IN WASHINGTON D.C.  
President Donald Trump's State of the Union Address was a huge success.

Here at home, Oregon Republicans look towards continuing improvements in the economy, thanks to changes in Washington D.C. despite the work of the Oregon Democrat-controlled Legislature. Republicans are leading the way and nearly everyone is experiencing growth in wages, reduction in taxes and improving their economic outlook. We are all excited for the continuing success of this nation and our state, except the Democrats and the mainstream media.

## OREGON HOUSE REPUBLICAN OFFICE

### House Republicans respond to Governor Brown's State of the State Address

Salem, Ore. - House Republican Leader Mike McLane (R-Powell Butte) issued the following statement after Governor Kate Brown delivered her State of the State address to a joint session of the Oregon Legislature:

"It's hard to appreciate Governor Brown's future aspirations for our state when she has failed to address so many problems here in the present. The governor gave only a passing reference to our PERS crisis, she did not address the scandals that have plagued the Oregon Health Authority, and she failed to provide any clear vision for how she would address the heartbreak and suffering of our state's Foster Children. When is our state government going to get serious about solving the real problems that are staring right at us?"

Republican Legislators Need Your Support To STOP Democrat's Cap & Trade Tax Scheme  
PORTLAND--Understanding Oregon's 'cap and invest' climate bills. Oregon lawmakers this week dove into the most complicated and controversial debate of the upcoming 35-day legislative session: legislation that sets up a market-based, carrot-and-stick approach to reducing greenhouse gas pollution. The two bills will pit environmental advocates determined to see the state do more to combat climate change against business interests who believe the policy is either not ready for primetime or, worse, a job-killing energy sales tax that will deliver little benefit for the planet.
