## Rep. Greg Barreto's Newsletter

March 3, 2020

Good morning,

I wanted provide you with the most recent information we have received from the Oregon Health Authority about Coronavirus.

There is a confirmed case of the Coronavirus in Umatilla County. The details from the OHA are included below.

Good hygiene is critical to stop the spread of the virus. Please wash your hands frequently, **stay home** if you are sick, and if you show symptoms please **call** your doctor.

Thank you,  
Greg

# Oregon identifies third presumptive positive case of COVID-19

# Oregon identifies third presumptive positive case of COVID-19

We want to share this press release with you that went out to the media:

we want to share this press release with you that went out to the media.

PORTLAND, Ore.— Oregon health officials have identified a third presumptive positive case of COVID-19 among state residents. The third case is an adult Oregon resident from Umatilla County who is hospitalized in Walla Walla, Wash.

State and local health officials are moving quickly to contact people who may have been in close contact with the individual who tested as a presumptive positive case. The third case is not linked to travel to a part of the world with known cases of COVID-19. It is considered a case of community transmission.

Preliminary reports indicate the Oregon resident attended a youth basketball game at a gymnasium at Weston Middle School, 205 E. Wallace St. in Weston, Ore., on Saturday, Feb. 29.

Under federal Centers for Disease Control and Prevention (CDC) guidelines, other spectators who may have been in a closed environment with the individual would be considered “low-risk” exposures.

Athena-Weston School District officials have closed the gym and will conduct a deep cleaning out of an abundance of caution. The gym is physically detached from the rest of the school. Health officials do not consider the separate school building to pose any risk of exposure.

The test on the sample was performed by Washington’s public health laboratory. The case was one of Oregon’s pending cases. Oregon health officials have updated their case and testing reports on OHA’s [COVID-19 web page](#).

Oregon and Washington health experts are working together to determine if there are other locations where the individual may have interacted with other people in recent days, after symptoms of COVID-19 first appeared.

Health officials will announce if there are any additional locations where people may have been exposed, if they are determined.

People who may have attended Saturday’s basketball game can call the following numbers if they have questions.

- Oregon residents can call 211.
- Washington residents:
  - Washington State Department of Health: 800-525-0127, press #
  - Walla Walla County: 509-524-2647

OHA continues to recommend all people in Oregon take everyday precautions to prevent the spread of many respiratory illnesses, including COVID-19 and influenza:

- Cover your coughs and sneezes with a tissue and then throw the tissue in the trash.
- Wash your hands often with soap and water for 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect surfaces that are often touched.
- Take care of your health overall. Staying current on your vaccinations, including flu vaccine, eating well and exercising all help your body stay resilient.
- Consult CDC’s travel website for any travel advisories and steps to protect yourself if you plan to travel outside of the US.

Most people with COVID-19 have mild symptoms. If you are feeling sick with mild symptoms and do not need to see medical care, stay home while you recover. If you are sick and plan to seek care, please call before going in for care so arrangements can be made to prevent exposing others. For urgent medical needs, call 911.
